## Course Overview:

This online course is tailored for healthcare professionals working with people aged under 40, including doctors, nurses, consultants, and other health and social care workers. The course is especially beneficial for professionals involved in the care of young adults with early onset type 2 diabetes, helping them improve treatment outcomes and address specific care gaps.

## Modules cover a range of key topics, including:

**Diagnosis and  
 initial management**

**Pre-conception  
 and pregnancy  
 care**

**Cardio-renal-  
 metabolic  
 management**

**Psychological  
 wellbeing and  
 support for  
 younger patients**

**Each module takes  
 approximately 30-  
 40 minutes to  
 complete**
